

1. Install MAMP/XAMP.
2. Put the folder "Repository" inside the MAMP/XAMP folder "htdocs".
3. Run MAMP/XAMP, start it and open a browser and search for localhost.
4. In the localhost open PhpMyAdmin, that is inside the "Tools" section.
5. Go to "Import" on the right side navigation bar, change in "Format-specific options" the SQL compatibility mode from "NONE" to "TRADITIONAL" and select the mySQL document "CW_database_create&populate". After select go.
6. Go again to the localhost and select "My Website".
7. After that just select "Repository" -> "project3". And welcome to Conspiracy World.
8. Create an account to be able to use the whole website.
